LAB-2

SUBMITTED 19 Sep, 2026

VISUAL PROGRAMMING LAB Sir. Qadeer Yasin

Submitted By:

Imad Khan	2500623
-----------	---------

Lab Objectives:

This lab is designed for teaching and implementation directly in Microsoft Visual Studio. Students will first create a C# Windows Forms GUI and then create a responsive web application using HTML, CSS and Bootstrap.

Learning Objectives

- Create a Windows Forms project in Visual Studio.
- Design a GUI using Toolbox controls and the Properties window.
- Create C# Click events and connect code with GUI controls.
- Create an ASP.NET Core web project in Visual Studio.
- Create HTML structure and link a separate CSS file.
- Use Bootstrap CDN, grid, navbar, cards, buttons, forms and tables.
- Test a responsive web application in a browser.

Required Visual Studio Setup

- Visual Studio 2022 Community, Professional or Enterprise.
- .NET desktop development workload.
- ASP.NET and web development workload.
- A modern browser such as Microsoft Edge or Google Chrome.
- If Visual Studio is already installed for C++, open Visual Studio Installer → Modify and ensure both required
- .NET workloads are selected.

TASK 1

University Student Registration System (Windows Forms)

Develop a complete **C# Windows Forms Student Registration System** in Visual Studio.

Requirements

- Create a professional form using Labels, TextBoxes, ComboBoxes, RadioButtons, DateTimePicker and RichTextBox.
- Fields:
 - Student Name
 - Student ID
 - Email
 - Phone
 - Date of Birth
 - Gender
 - Program
 - Semester
 - Address
- Add **Submit, Clear and Exit** buttons.
- Submit must validate required fields and display the submitted information.
- Clear must reset all controls.
- Exit must close the application.
- Use appropriate fonts, alignment, spacing and control names.

Suggested Control Names

Control	Name
TextBox	txtName
TextBox	txtStudentId
TextBox	txtEmail
TextBox	txtPhone
DateTimePicker	dtpDob
RadioButton	rbMale
RadioButton	rbFemale
ComboBox	cmbProgram
ComboBox	cmbSemester
RichTextBox	txtAddress
Button	btnSubmit
Button	btnClear
Button	btnExit

Control	Name
Label	lblResult

Expected Result

A complete student registration GUI that accepts information, validates required fields, displays the submitted record, clears the form and exits correctly.

CODE:

```
using System;
using System.Drawing;
using System.Windows.Forms;

namespace StudentRegistrationSystem
{
    public partial class Form1 : Form
    {
        // Controls
        private Label lblName;
        private Label lblStudentId;
        private Label lblEmail;
        private Label lblPhone;
        private Label lblDob;
        private Label lblGender;
        private Label lblProgram;
        private Label lblSemester;
        private Label lblAddress;
        private Label lblResult;

        private TextBox txtName;
        private TextBox txtStudentId;
        private TextBox txtEmail;
        private TextBox txtPhone;

        private DateTimePicker dtpDob;

        private RadioButton rbMale;
        private RadioButton rbFemale;

        private ComboBox cmbProgram;
        private ComboBox cmbSemester;

        private RichTextBox txtAddress;

        private Button btnSubmit;
        private Button btnClear;
```

```

private Button btnExit;

public Form1()
{
    InitializeComponent();
    CreateForm();
}

TASK 2

University Course Portal (HTML + CSS + Bootstrap)

Develop a responsive **University Course Portal** in Visual Studio.

Requirements

- Create an **ASP.NET Core Empty** project.
- Place web files inside wwwroot.
- Create a responsive navbar with:
 - Home
 - Courses
 - Registration

- Contact
- Create a hero/welcome section with a **View Courses** button.
- Create at least **six course cards**.
- Each course card must show:
 - Course Code
 - Course Title
 - Credit Hours
 - Description
 - Register button
- Create a responsive registration form with:
 - Name
 - Student ID
 - Email
 - Program
 - Semester
 - Course
- Create a responsive table containing at least **five registered students**.
- Use Bootstrap:
 - Grid
 - Cards
 - Buttons
 - Forms
 - Table
 - Spacing utilities
- Create a separate style.css file.
- Add a CSS hover effect to course cards.
- Test the page on desktop and mobile widths.

Required Project Structure

```

UniversityCoursePortal/
├── Program.cs
└── wwwroot/
    ├── index.html
    └── style.css
  
```

Required Bootstrap Components

Component Minimum Requirement

Navbar	Responsive navigation
Grid	Container + row + responsive columns
Cards	Six course cards
Buttons	At least three Bootstrap button styles
Form	Text, email and select controls
Table	Responsive striped/bordered table

Component Minimum Requirement

Utilities Spacing/alignment classes

Expected Result

A responsive University Course Portal containing a navbar, hero section, six course cards, registration form, registered-students table, contact section and footer.

index.html

```
